

Voices of glasstec 2022

Sasu Koivumäki, CSO at Glaston Corporation

"Meeting customers and partners in person after a long time is something we've all waited. Joining glasstec 2022 as unified Glaston team with extended offering covering the wide range of insulating glass, heat treatment and automotive and display glass technologies has been a great experience. In addition to good discussions and seeing happy faces, we have had a very successful four days with new deals, new insights and strengthening existing relationships."

Dr. Frank Heinrich, SCHOTT CEO

Since the beginning, SCHOTT has been an exhibitor at the glasstec in Düsseldorf. After four years, we could participate on-site again with a great booth, engage in exciting conversations and expand our overall network. In addition to our creative product presentation, visitors learned how we, as an energy-intensive specialty glass company, plan to become climate-neutral by 2030. All in all, the glasstec has been a great success.

Dr. Philipp Zippe, CEO, Zippe Industrieanlagen GmbH

"It was an important signal that the Glasstec 2022 could take place. The personal contact is a catalyst for successful international business. What was apparent was as well the high quality of visitors in terms of expertise and professional competence. It was an excellent fair. "

**Dr. Stephan Kranz, CEO SAINT-GOBAIN BUILDING GLASS
DEUTSCHLAND**

“We are very satisfied with the trade show. As in previous years, our booth was very well attended and we were able to have a good exchange with our local and international customers in the numerous, intensive discussions. A central theme throughout glasstec was sustainability and the decarbonization of the glass industry. We were therefore particularly pleased with the high level of response to the world's first low carbon glass ORAÉ®, which we are now making available for our customers. Leading in decarbonization is completely in the sense of our purpose "Making the world a better home". So, all in all, we draw a very positive conclusion from glasstec 2022.”

Arne Klöfkorn, Board of Directors, Bohle AG

The anticipation for glasstec 2022 after a four-year break from the fair was great, despite all the uncertainty. We are all the more pleased that we can look back on successful trade fair days with good customer and press discussions. Not only our new stand concept was well received by the visitors, but also the interest in our exhibited products - all new developments by Bohle since the last glasstec - met with great approval. It was nice to see that especially the international audience found their way to Düsseldorf.

**Mr. Fontanelli, Commercial Director and Mr. Dalmaso, Sales
Director, Biesse Group**

“After four years, we are heading back to Glasstec, an unmissable event for the glass industry, and we are delighted to be able to invite our customers to visit us at our truly comprehensive stand. Indeed, as of this year, the acquisition of the Forvet company enables us to welcome visitors to an exhibition area that is teeming with highly automated, customised and unique machines and systems for the glass processing sector, with an enhanced offering for the higher end of the market,” confirms Lanfranco Fontanelli, Glass, Stone and Advanced Materials Commercial Director.

“Forvet has become part of Biesse Group, cementing its presence with a number of different technological solutions such as double edgers,

cutting benches and automatic warehouses, designed to create fully automated production lines with very high levels of automation. We offer complementary industrial solutions that can be perfectly integrated with each other, in order to ensure high levels of productivity and flexibility to the customers who choose our technologies”, adds Sergio Dalmaso, Glass & Stone Systems Sales Director.
